* Income as shown on your last award letter.

** With Income-Related Employment Support Allowance only.

What type of boilers qualify?

The efficiency of your boiler should be less than 86% which means it will be rated between C and G. Boilers over 5 years old typically fall within this range. A and B rated boilers can also be replaced if there is a fault such as; needs pressurising regularly, pilot light will not stay on, heating and/or hot water not working, making a noise, etc.

Note that grants are not available to pay for the replacement of radiators only. There are also no grants for full Central Heating systems at this time.

Boiler/System Criteria

- Existing Boiler rating from C to G
- Boiler must be under 86% efficient
- Boiler is more than 5 years old
- Check [PCDB Database](#) if not sure
- No grants for radiators or full heating
- Property must have mains gas
- A/B rated Boilers with a fault qualify
